SUMMARY

I am Passionate IT student with expertise in programming languages like Python, Java, and JavaScript. Skilled in web development, databases, and software engineering. Committed to continuous learning and staying updated with emerging technologies. Thrives in collaborative environments and enjoys tackling complex problems. Dedicated to making a meaningful impact in the field of Information Technology

EXPERIENCE

Backend Developer

Nyxusbyte Tech

November 2023 - January 2024, Itharee

- As a Django backend developer intern at NyxusByte Tech, I worked on diverse projects, gaining hands-on experience in designing and maintaining backend systems. Collaborating with a skilled team, I contributed to a live project, enhancing my troubleshooting and optimization skills. Regular code reviews and tech talks further enriched my learning. The internship at NyxusByte was a valuable experience, shaping me into a more adept and knowledgeable developer.

PROJECTS

Travel Management System

NyxusByte Tech • <https://github.com/shahpankaj123/Travel-Management-System> • January 2024 - January 2024

- The Travel Management System is a web-based application built with Django, Celery, and Redis, offering a comprehensive solution for managing travel-related activities within an organization. This project was developed by Anuj Bhattarai and Pankaj Shah

BookStore

NyxusByte Tech • <https://github.com/shahpankaj123/Online-BookStore> • January 2024 - January 2024

- Bookstore Project, a web application built using Django! This project aims to create an online bookstore where users can browse, search, and purchase books. It includes features such as user authentication, a shopping cart, and order processing.

Chat application

NyxusByte Tech • <https://github.com/shahpankaj123/Chat-app-using-Django-channels> • December 2023 - January 2024

- This repository contains a simple chat application built with Django Channels. Django Channels extends Django to handle WebSockets, allowing real-time communication between clients and the server.

Authentication System

NyxusByte Tech • <https://pankaj123.pythonanywhere.com/> • November 2023 - January 2024

- A straightforward and secure Django-based email authentication system with built-in features for password recovery through Gmail and account activation via Gmail. This system is designed to simplify user authentication for your web application while providing robust security and a seamless user experience.
